

## CITY REFUSES UNION DEMANDS

The city council took another stand on labor union demands Friday when it refused to meet the demand of the carpenters' union that a carpenter be given a job in the laying of deep sewers for the city.

According to city officials familiar with the case of "carpenters" work to be done in deep sewer work, now and then a pinch has to be saved or a board nailed or a hole bored. This work in the average course of laying deep sewer walls in would require only a few minutes or perhaps as much as an hour during the entire day.

The carpenters' union, according to the city council, wanted the city to pay a carpenter \$6 a day to "back amount" and the annual work which would require only a few minutes.

The council last week instructed city officials to deny the demand. He did not believe that the city should pay a carpenter \$6 a day to do a few minutes of work. The city council Wednesday and renewed their demand. The city council set an hour Friday for them to come back.

The carpenters did not show up so the council passed the matter definitively.

Mayor Charles Davis said the city when it had any work outside of its regular department to be done gave the job to union men because he believed better results were obtained. But he and the council stood as a unit against meeting the demand of the labor union for work which came under one of the regular departments and which heretofore has been efficiently done by other workers in the employ of the city.

**Also Judge Essex Fineness By the Hudson Standard**

**The Essex Is Famous for Beauty as Well as Performance**

**Hudson Design and Super-Six Motor Still World Supreme**

Every day you see Hudsons, two and three years old, which, both in style and performance, might well be judged of recent production.

Advanced ideas you will always find in Hudson. That fact created its style leadership. But they must earn their right to belong. No mere straining after something new has ever won place for a single feature in Hudson design.

On fashionable boulevards you see more Hudson chauffeur-driven cars than any other make. Yet leadership in style alone was not enough to win such recognition.

**Hudson Leads All Fine Cars in Performance**

Hudson's chief advantage has always been in performance. Its many official speed, power and endurance records were made four or five years ago. But they still stand. They account for Hudson becoming the world's largest selling fine car.

These records are the reason why no change has ever been made in the principle of the Super-Six motor. It is exclusive in Hudson. You can get its advantages in no other car.

Essex performance proofs naturally overshadow its qualities of quieter appeal. For prior to Essex, it was held that light weight must mean some forfeit in smoothness, speed, power and endurance.

But even those whose choice was decided by its supreme performance ability are captivated by its notable beauty of design, its luxurious fittings and its quiet riding ease.

It is not merely that Essex matches large, high priced cars in comfort. It is not only its speed, its quickness at the getaway and its quiet mastery of the hills. Its charm is the combination of these qualities with a flying smoothness in action and a responsiveness that heeds the lightest touch.

**Great Surplus Power Makes Driving a Joy**

Abundant surplus power handles the Essex with ease in every situation. This surplus power and strength, beyond any need you will ever have, accounts for Essex smoothness in tasks at which many cars strain with permanent injury to their mechanism.
